

*If this house could talk
it would boast the fiber optic technology
running through it and mock others that
"stop at the curb." It would go on about its
neck-breaking speeds and more-real-than-real clarity.
It would tell you it's one of thousands of
fiber optic homes in the Hill Country
—all powered by GVTC.*

So, what would your house say?

GVTC[®]
COMMUNICATIONS

Just plain smart.®
